 **@rswebdesigner**

 **tamizhographer**

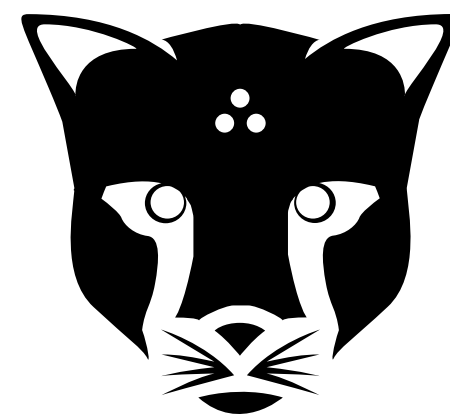

+

***“Solve the right problems,
solve the problems right”***

***“Solve the right problems,
solve the problems right”***

*“ Solve the right problems,
solve the problems right ”*

***“Solve the right problems,
solve the problems right”***

SOLID, Domain Driven Design, 7 Design Principles, Goal Driven Development, TDD

RDD

Readme Driven Development

“Write the Readme first”

“Write the Readme first”

“*Write the Readme first*”

“*Write the Readme first*”

How?

```
$ cat > README.md
```

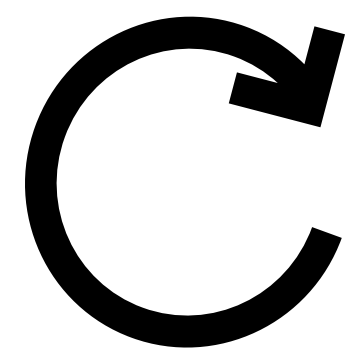

```
# Laravel Package CLI
```

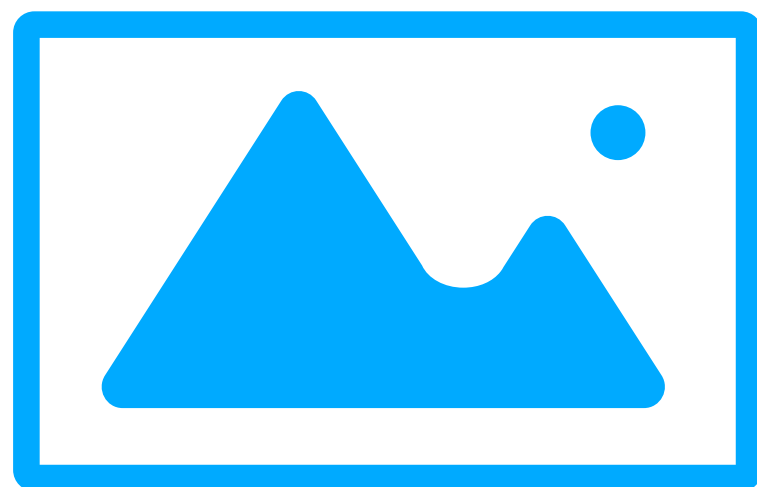

Laravel Package CLI

Getting Started

Usage

Y tho?

The bigger picture

Speak the same language

Verify your idea

Doing TDD?
You have your features

You have a README

RDD !== DDD

One single file:
README.md

RDD !== DDD

Say “**NO**” to perfection

~~**RDD everywhere**~~

Examples?

Package Development

API Driven Development

SDK Development

Microservices

tl;dr

Thank You!

Shout now if you have questions!
